

Every Day Mine Services secures Auger drilling contracts

23 October 2007

Every Day Mine Services Limited (“EDMS”) has secured two drilling contracts with newly ASX listed Auger Resources Limited (ASX:AUK).

The first drilling contract involves an initial 3,000 metres of Reverse Circulation drilling at Augur’s Collierina tenement. The drilling program is due to commence in mid – November, with an option for Augur to extend the contract for a further 3,000 metres of project extension drilling.

The second contract is for an initial 7,000 metres of diamond and RC drilling at Augur’s Yeoval project, using one of EDMS’ multi-purpose drill rigs. This contract also has an option for Augur to undertake a further 5,000 metres of exploration drilling at Yeoval.

EDMS’ management estimates that these contracts will generate additional revenue of approximately \$1 million in the current financial year.

EDMS Managing Director, Roger Jackson said “Obtaining these Auger drilling contracts demonstrates our continued commitment to deliver on the company’s expansion program outlined in EDMS’s prospectus. We are ideally placed to provide a high level of service from our Cobar operational headquarters.”

“We are delighted to be able to work with Auger Resources on these contracts, and we have confidence that Augur, which listed its shares on ASX yesterday, will become a valuable customer for the company” he added.

About EDMS

Based in the mining hub of Cobar in western NSW, EDMS and its subsidiaries have been providing a diverse range of services to the mining and infrastructure sector for more than 12 years. The business has established a high quality reputation in the industry, providing services to some of the leading miners in Australia including Glencore, CBH Resources and Peak Gold.

EDMS caters to the mining industry with operations in contract drilling, general mine services, fibrecrete production and labour hire. Its clients include a wide range of companies with producing hard rock mines extracting metals such as copper, gold, lead, zinc and silver. It now has a fleet of 20 drill rigs servicing both surface and underground applications. In addition it also has three down-the-hole hammer rigs.
